

IPH 593 : Integrated pharmacotherapy VI: Infectious diseases

Integrated pharmacotherapy courses aims to build the knowledge of the students about how to manage patients with different pathological conditions. This course in particular will focus on application of the knowledge acquired from microbiology, advanced microbiology, pharmacotherapy of antimicrobial agents, to progress with understanding the clinical microbiology, and pathophysiology of common infectious diseases. Current practice guidelines for the management for such diseases will follow along with a small exercise that introduces a one simple case to discuss the therapeutics options suitable. Application of the knowledge acquired in this course will be applied in the '93case based seminar'94 course that run in parallel to it in 7 weeks period.
