

IPP 596 : Introductory Pharmacy Practice Experience II

In these two introductory pharmacy practice experience courses, the student is required to spend 5 hours/week; comprising 75 hours of training in each course (150 hr of total training) in an institutional environment. These two courses will provide the students with great practice experiences in institutional outpatient pharmacy services and institutional inpatient pharmacy services, respectively. Students will apply basic practice skills and interface with patients and providers including evaluating medication orders, prescriptions, dispensing of medications and other pharmaceutical services.
