

RES 5X6 B : Research project

Students will enroll themselves in a graduation research project during semester 10 of the fifth year. The aim of the course is to give the students an opportunity to perform a research project within the field of an emerging area of pharmaceutical sciences/ practice of interest under direct supervision of a faculty member from the college of pharmacy. Students will apply research knowledge and skills to design, implement, show independence, critical and creative thinking, and to execute their research projects. Students will summarize the results in a research report and present the results of the project to the academic community as a poster presentation in the '93Research week'94.
